# Mobility pre-COVID was *dramatic*

**140**

**95**

**45**

# ***Covid crisis impact:*** *Impact on Public Transport*

Employee safety

Limited capacity

Tomorrow

A new reality

# 4 alternatives to Public Transport

Work from home

Bikes

Alternative mobility

Cars

# Remote working

***Companies will be more flexible in terms of remote working as processes have been put in place during the lockdown***

***Next to remote working, flexible working hours will allow workers to avoid peak hours***

***Mobility budget can be applied if the employee spends 12 days or more remote working (Skipr web dashboard)***

Work from home

# Biking

***Bike purchases have exploded during the lockdown as weather was outstanding and own vehicle is considered safer***

***Infrastructure in European large cities are being improved for cyclists***

- ***Paris: +400km***
- ***Brussels: +40km***

***Mobility budget can be used to purchase a bike (Skipr card)***

Work from home

# Alternative mobility

**Limited PT capacities and increase in traffic will push people towards alternative mobility**

**Safety measures need to be guaranteed by operators to safeguard users health**

**Negative advise of authorities might limit the use of alternative mobility in the short term (as already demonstrated in certain companies)**

**Trust and comfort can be provided by MaaS platforms (Skipr app)**

Alternative  
mobility

**skipr**

# More cars = more traffic jams

***Relationship between cars and jams is not linear but exponential***

***More cars with less road capacity will be dramatic (scissor effect) and lead to a spike in pollution, time lost and cost (road maintenance)***

***Cars can be used to get to (more) parkings at city entries or public transport stations (Skipr app)***

Cars

# *What is important for companies*

Companies want **ALL** employees to know **THEY** safeguard their **SAFETY** when **GOING OR BEING** at **WORK**

*Our solution*

## ***For employee mobility:***

- *White-labelled intermodal app with solutions taking care of social distancing (ie. PT out in peak)*
- *Flexibilisation of mobility through in app purchase of PT of peak, Poppy, Bird, Dott, Mobit, ...*
- *Visibility on methods of transport used, enabling company policies (home-work and business trips)*

## ***For visitors:***

- *Skipr link enabling you to help your visitors come to your office in safe conditions*
- *Track your visitor mobility, access of your office through dashboarding*
