Bert Quaeghebeur – Product management

General principles

- De Lijn offers mobile versions of products via De Lijn app and via 3rd party apps: single tickets en m-card10.
- Level playing field since april 2016: open agreement can be subscribed by all 3rd parties who comply with conditions.

The future of m-ticketing

- All products offered in mobile version and available to 3^e parties, incl. daypasses & season passes (start with pilot).
- Format of tickets & traveler identification data will be reviewed considering fraud risk and customer support.

Impact on technical solution is being investigated.
Objective to make new solution available by 2020/Q1.
