

SOLVAY

asking more from chemistry®

Welcome by hosts : first experiences with Autonomous shuttles

Workshop autonomous shuttles ITS

12/02/2020

Solvay's vision on Mobility : no mobility without chemistry

Chemistry has a significant role in helping advance technologies for cleaner mobility

Solvay spotlights sustainable mobility :

- Battery technologies which increase the autonomy of autonomy vehicles
- Lightweighting materials which reduce CO₂ emissions

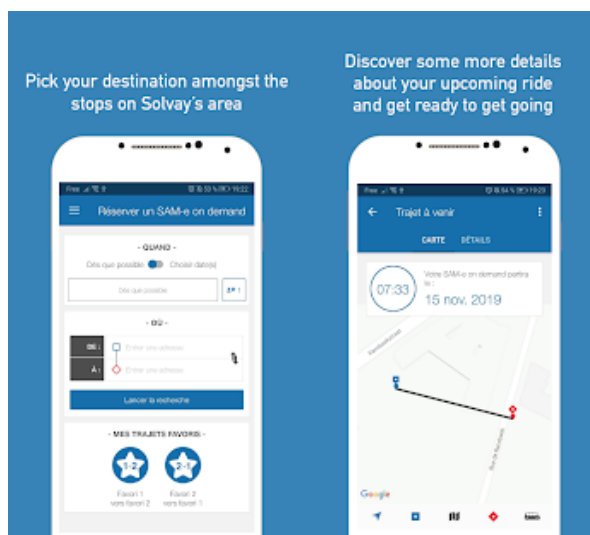

Solvay's vision on Mobility : becoming a forerunner in employees mobility

Offering innovative and flexible mobility solutions to encourage employees to organise their mobility in an efficient and responsible way

Comfort and easiness

Experience feedback

Positive evolution of the experience:

- Improvement of the settings as the experience went on
- Adaptation of user demands and needs

Feedbacks of employees:

- Enthusiasm to test new mobility solutions
- Stick with their first impressions
- Slowly by slowly, change in habits
